Re: Sunoco Partners Marketing & Terminals L.P. - Marcus Hook Industrial Complex Title V Permit AQM-003/00021
Semi-Annual Deviation Report - Ist Half 2021

Dear Program Administrator,

Pursuant to DNREC Title V Permit, AQM-003/00021, please find attached one (1) original and one (1) copy of the SPMT Semi-Annual Deviation Report for the period from January 1, 2021 through June 30, 2021.

Please feel free to call me at (610) 859-1279 if you have any questions.

Sincerely,

Cc:

		SEMI-ANNUAL REPORT						
	DATE REVIEWED:							
	REVIEWD BY:							

The Company shall submit to the Department and EPA Region III a report of any required monitoring and a report of any deviation(s) from permit requirements. This report shall be submitted no later than August 1 (covering the period from July 1 through December 31) of each calendar year. [Reference 7 **DE Admin. Code** 1130 (Title V) State Operating Permit Condition 3.3.2 and 7 **DE Admin. Code** 1130 Sections 6.1.3.3.1, 6.1.3.3.2, and 6.1.3.3.3.4 dated 12/11/00] Refer to the <u>Instructions for Completing Semi-Annual Reports and Form AQM-1001DD</u> dated July 27, 2001 and revised November 22, 2004 for questions concerning the use of this form.

Table 1 — Report of Any Required Monitoring

EU 09	Emission Unit/Point	COLUMN A
A. The Company shall monitor the following equipment in the ethylene plant for leaks according to the provisions of this section: 1. Compressors. 2. Pumps in light liquid service. 3. Valves in light liquid service. 4. Valves in gas/vapor service. 5. Pressure relief valves in gas/vapor service. [Reference: Regulation 24, Section 40, dated 1/1/93] B. These requirements do not apply to: 1. Any equipment in vacuum service. 2. Any pressure-relief valve that is connected to an operating flare header or vapor recovery device. 3. Any liquid pump that has a dual mechanical pump seal with a barrier fluid system. 4. Any compressor with a degassing vent that is routed to an operating VOC control device. [Reference: Regulation 24, Section 40(a)(3), dated 1/1/93] ii. Operational Limitations: The Company shall ensure that: A. Any open-ended line or valve is sealed with a second valve, blind flange, cap, or plug except during	App ing i	COLUMN B
Compliance Method: Compliance shall be demonstrated in accordance with the monitoring/testing, and recordkeeping requirements of this condition. [Reference: Regulation 30, Section 6(a)(3), dated 11/15/93] iv. Monitoring/Testing: A. Equipment inspection program. 1. The Company shall conduct quarterly monitoring of each: a. Compressor. b. Pump in light liquid service. c. Valve in light liquid service. d. Valve in gas/vapor service. e. Pressure relief valve in gas/vapor service. 2. The Company shall conduct a weakly vicinal	Monitoring	COLUMN C

		operations requiring process find now through the open-ended line or valve. 3. When a second valve is used, each open-ended line or valve equipped with a second valve is open-ended in such a manner that the valve on the process fluid end is closed before the second valve is closed. C. When a double block-and-bleed system is used, the bleed valve or line is open only during operations that require venting of the line between the block valves and is closed at all other times. [Reference: Regulation 24, Section 40(c), dated 1/1/93]
visible tag in a bright color such as red or yellow bearing the equipment identification number and the date on which the leak was detected. This tag shall remain in place until the leaking equipment is repaired. The requirements of this paragraph apply to any leak detected by the equipment inspection program and to any leak from any equipment that is detected on the basis of sight, sound, or smell. [Reference: Regulation 24, [Reference: Regulation 24, [Reference: Novel Actor 14, 1031]	million (ppm) or greater is measured, it shall be determined that a leak has been determined there are indications of liquid dripping from the equipment, it shall be determined that a leak has been determined that a leak has been detected. 5. When a leak is detected, the Company shall affix a weatherproof, readily	liquid service. 3. The Company shall monitor each pressure relief valve after each overpressure relief valve after each each and is not leaking. [Note exemption given in paragraph (i)(B)(2) of this section.] 4. Leak Standards: a. When an instrument

light liquid service. 2. If the percent of valves leaking is equal to or less than 2.0 for five consecutive quarters, the Company may skip three of the quarterly leak detection periods per year for the valves in gas/vapor and light liquid service, provided that each valve shall be monitored once each year. 3. If at any time the percent of valves leaking is greater than 2.0, the Company shall resume compliance with the requirements in paragraph (A) of this section. 4. The percent of valves leaking shall be determined by dividing the sum of valves found leaking shall be determined by dividing the sum of valves found leaking valves for which repair has been delayed by the total number of valves subject to the requirements of this Section. [Reference: Regulation 24, Section 40(e), dated 1/1/93] C. Alternative standards for unsafe-to-monitor and difficult-to-monitor valves. 1. Any valve is exempt from the requirements of	quarterly leak detection periods for the valves in gas/vapor and	leaking is equal or less than 2.0 for two consecutive quarters,	for valves - Skip period leak detection and repair.

a. The Company nonstrates that the valvasafe to monitor becaus intoring personnel would xposed to an immediate danger. The Company adhe a written plan that requirements of the valve is exer rom the requirements of agraph (A) as a difficult monitor valve if: a. Any valve is exer rom the requirements of agraph (A) as a difficult monitor valve if: a. The Company adhe if: a. The Company monstrates that the valve are support surface. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit
Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit
Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit
Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit
Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit
Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit shurtown. Benair of such	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit
Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit shutdown. Repair of such	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit shutdown. Repair of such	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit shutdown. Repair of such	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit shutdown. Repair of such
Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit shutdown. Repair of such	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit shutdown. Repair of such	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit shutdown. Repair of such	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit shutdown. Repair of such
Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit shutdown. Repair of such	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit shutdown. Repair of such	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit shutdown. Repair of such	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit shutdown. Repair of such
Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit shutdown. Repair of such	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit shutdown. Repair of such	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit shutdown. Repair of such	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit shutdown. Repair of such
Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit shutdown. Repair of such	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit shutdown. Repair of such	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit shutdown. Repair of such	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit shutdown. Repair of such
Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit shutdown. Repair of such	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit shutdown. Repair of such	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit shutdown. Repair of such	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit shutdown. Repair of such
Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit shutdown. Repair of such	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit shutdown. Repair of such	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit shutdown. Repair of such	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit shutdown. Repair of such
Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit shutdown. Repair of such	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit shutdown. Repair of such	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit shutdown. Repair of such	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit shutdown. Repair of such
Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit shutdown. Repair of such	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit shutdown. Repair of such	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit shutdown. Repair of such	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit shutdown. Repair of such
Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit shutdown. Repair of such	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit shutdown. Repair of such	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit shutdown. Repair of such	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit shutdown. Repair of such
Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit shutdown. Repair of such	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit shutdown. Repair of such	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit shutdown. Repair of such	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit shutdown. Repair of such
Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit shutdown. Repair of such	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit shutdown. Repair of such	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit shutdown. Repair of such	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit shutdown. Repair of such
Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit shutdown. Repair of such	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit shutdown. Repair of such	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit shutdown. Repair of such	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit shutdown. Repair of such
Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit shutdown. Repair of such	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit shutdown. Repair of such	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit shutdown. Repair of such	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit shutdown. Repair of such
Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit shutdown. Repair of such	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit shutdown. Repair of such	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit shutdown. Repair of such	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit shutdown. Repair of such
Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit shutdown. Repair of such	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit shutdown. Repair of such	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit shutdown. Repair of such	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit shutdown. Repair of such
Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit shutdown. Repair of such	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit shutdown. Repair of such	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit shutdown. Repair of such	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit shutdown. Repair of such
Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit shutdown. Repair of such	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit shutdown. Repair of such	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit shutdown. Repair of such	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit shutdown. Repair of such
Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit shutdown. Repair of such	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit shutdown. Repair of such	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit
Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit
Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit
Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit
Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit
Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit
Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit
Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit
Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit
Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit
Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit
Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit
Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit
Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit
Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit
Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit
Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit
Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit
Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit
Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit
Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit
Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit
Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit
Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit
Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit
Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit
Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit
Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit
Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit
Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit
Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit
Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit
Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit
Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit
Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit
Section 40(g), dated 1/1/93] E. Delay of repair. 1. Delay of repair of equipment for which a leak has been detected is allowed if repair is technically infeasible without a process unit	[Reference: Regulation 24, Section 40(g), dated 1/1/93] E. Delay of repair. 1. monitoring required to comply this Section, the Company shall use the test methods specified in Appendix "F" of Regulation No. 24. 2. The Company shall demonstrate that a piece of equipment is in light liquid service by showing that all of the following conditions apply: a. The vapor pressure of one or more of the components is greater than 0.3 kPa (0.044 in. Hg) at 20 degrees Celsius (68 degrees Fahrenheit) standard reference texts or ASTM D2879 shall be used to determine the vapor pressures. b. The total concentration of the pure components having a vapor pressure greater than 0.3 kPa (0.044 in. Hg) at 20 degrees Celsius (68 degrees Fahrenheit) is equal to or greater than 20 percent by weight. c. The fluid is a liquid at operating conditions. 3. Samples used in conjunction with paragraphs (F)(2) and (F)(3) of this Section shall be representative of the process fluid that is contained in or contacts the equipment. [Reference: Regulation 24, Section 40(i), dated 1/1/93] v. Recordkeeping: v. Recordkeeping: however the contained in or contacts the pollowing information shall be kept for 5 in log and shall be kept for 5
